

LĂCRIMIOARA GRAMA

DIGITAL SIGNAL PROCESSING

Laboratory Guide

UTPRESS

Contents

| | |
|--|-----------|
| Preface | i |
| List of Figures | vii |
| List of Tables | xiii |
| 1 Introduction to MATLAB | 1 |
| 1.1 General considerations | 1 |
| 1.1.1 Defining variables | 2 |
| 1.1.2 Built-in functions | 3 |
| 1.1.3 Scalars, vectors and matrices | 4 |
| 1.1.4 Function M-files | 6 |
| 1.1.5 Conditional and loops | 9 |
| 1.1.6 Graphics | 11 |
| 1.2 To be done | 13 |
| 1.3 Exercises | 15 |
| 2 Discrete-time signals | 17 |
| 2.1 General considerations | 17 |
| 2.1.1 Discrete-time sinusoidal signals | 17 |
| 2.2 MATLAB resources | 18 |
| 2.3 To be done | 20 |
| 2.4 Exercises | 26 |
| 3 Sampling of analog signals | 29 |
| 3.1 General considerations | 29 |
| 3.1.1 Analog-to-digital and digital-to-analog conversion | 29 |
| 3.1.2 Analog sinusoidal signals | 30 |
| 3.1.3 Sampling of analog signals | 31 |
| 3.1.4 Sampling theorem | 31 |
| 3.2 MATLAB resources | 32 |
| 3.3 To be done | 33 |

| | |
|---|------------|
| 3.4 Exercises | 40 |
| 4 Discrete-time linear time-invariant systems | 41 |
| 4.1 General considerations | 41 |
| 4.1.1 Classification of discrete-time systems | 41 |
| 4.1.2 Analysis of discrete-time linear time-invariant systems . | 42 |
| 4.1.3 Response of discrete-time linear time-invariant systems | 43 |
| 4.2 MATLAB resources | 44 |
| 4.3 To be done | 46 |
| 4.4 Exercises | 54 |
| 5 Discrete Fourier transform | 57 |
| 5.1 General considerations | 57 |
| 5.1.1 Discrete Fourier transform. Definition | 57 |
| 5.1.2 Properties of the discrete Fourier transform | 57 |
| 5.2 MATLAB resources | 61 |
| 5.3 To be done | 61 |
| 5.4 Exercises | 70 |
| 6 Linear and circular convolution | 71 |
| 6.1 General considerations | 71 |
| 6.1.1 Linear convolution for discrete-time signals | 71 |
| 6.1.2 Circular convolution for discrete-time signals | 72 |
| 6.2 MATLAB resources | 73 |
| 6.3 To be done | 74 |
| 6.4 Exercises | 84 |
| 7 Finite impulse response filters. Design methods | 89 |
| 7.1 General considerations | 89 |
| 7.1.1 Linear-phase FIR filters | 89 |
| 7.1.2 FIR filter design methods | 90 |
| 7.2 MATLAB resources | 94 |
| 7.3 To be done | 99 |
| 7.4 Exercises | 104 |
| 8 Discrete-time LTIS as frequency-selective filters | 107 |
| 8.1 General considerations | 107 |
| 8.1.1 Ideal filter characteristics | 107 |
| 8.1.2 Lowpass, highpass and bandpass filters | 107 |

| | | |
|-----------|---|------------|
| 8.1.3 | Digital resonators | 108 |
| 8.1.4 | Digital sinusoidal oscillators | 108 |
| 8.1.5 | Notch filters | 108 |
| 8.1.6 | Comb filters | 108 |
| 8.1.7 | All-pass filters | 109 |
| 8.2 | MATLAB resources | 109 |
| 8.3 | To be done | 109 |
| 8.4 | Exercises | 121 |
| 9 | IIR filters. Indirect design methods | 123 |
| 9.1 | General considerations | 123 |
| 9.1.1 | Design of IIR filters from analog prototype filters | 124 |
| 9.1.2 | Frequency transformations in the analog domain | 125 |
| 9.1.3 | Impulse invariance method | 127 |
| 9.1.4 | Bilinear transformation method | 127 |
| 9.1.5 | Advantages of IIR filters | 128 |
| 9.2 | MATLAB resources | 128 |
| 9.3 | To be done | 131 |
| 9.4 | Exercises | 141 |
| 10 | IIR Filters. Direct Design Methods | 143 |
| 10.1 | General considerations | 143 |
| 10.1.1 | Padé approximation method | 143 |
| 10.1.2 | Least-squares method | 144 |
| 10.1.3 | Yule-Walker | 148 |
| 10.2 | MATLAB resources | 148 |
| 10.3 | To be done | 149 |
| 10.4 | Exercises | 155 |
| 11 | Structures for the realization of FIR systems | 157 |
| 11.1 | General considerations | 157 |
| 11.1.1 | Direct-form structure | 157 |
| 11.1.2 | Cascade-form structure | 158 |
| 11.1.3 | Frequency-sampling structure | 159 |
| 11.1.4 | Lattice structure | 160 |
| 11.2 | MATLAB resources | 162 |
| 11.3 | To be done | 163 |
| 11.4 | Exercises | 172 |

| | |
|--|------------|
| 12 Structures for the realization of IIR systems | 173 |
| 12.1 General considerations | 173 |
| 12.1.1 Direct-form structures | 173 |
| 12.1.2 Cascade-form structures | 174 |
| 12.1.3 Parallel structure | 175 |
| 12.1.4 Lattice and lattice-ladder structures for IIR systems | 176 |
| 12.2 MATLAB resources | 180 |
| 12.3 To be done | 181 |
| 12.4 Exercises | 191 |
| 13 Quantization of digital filter coefficients | 193 |
| 13.1 General considerations | 193 |
| 13.1.1 Sensitivity analysis to quantization of filter coefficients | 194 |
| 13.2 MATLAB resources | 196 |
| 13.3 To be done | 198 |
| 13.4 Exercises | 219 |
| Bibliography | 221 |
